SUMMARY

Fourth-year Computer Science student who builds full stack web apps with JavaScript, React, Next.js and Node.js, with particular attention to front-end design. Looking for internships and freelance projects in front-end or full stack development.

EDUCATION

B.Sc. (Hons) Computer Science, Scottish Church College, Kolkata

Currently in 4th year

Higher Secondary (Class XII), St. Xavier's Institution, Panihati

PROJECTS

DRIPDUO

dripduo.vercel.app

Next.js, TypeScript, Tailwind CSS, Canvas API

- Designed and built the website for my own independent clothing brand and its FW26 collection, with an editorial product layout that works on phones and desktops.
- Built a loading animation that draws the brand's Bengali letter mark on an HTML canvas, using Catmull-Rom splines and a bristle effect to imitate a brush stroke.
- Redesigned the typography for legibility: larger minimum font sizes, reduced letter-spacing, and styles moved into a shared CSS class system.

FUXI AI – Chrome extension

github.com/AyushKirtania-tech/FUXI-AI

React, Vite, Tailwind CSS, Chrome built-in AI APIs (Gemini Nano)

- Finds an open tab from a typed query by searching the text of each page, and opens sites from short commands.
- Groups tabs into named sets with Chrome's on-device Gemini Nano model; the interface can be translated with Chrome's Translator API.
- Runs entirely in the browser, so no tab content is sent to an external server.

OTP Auth System

github.com/AyushKirtania-tech/otp-auth

Next.js, Express.js, PostgreSQL (Prisma), Redis, BullMQ, Zod

- One-time-password login and registration, split into a Next.js frontend, an Express API and a background worker.
- The API queues SMS jobs in Redis (BullMQ) and the worker sends them through Fast2SMS, so requests do not wait for SMS delivery.
- Validates input with Zod and uses JWT for authentication.

F1 UpToDates

f1-up-to-dates.vercel.app

HTML, CSS, JavaScript

- A Formula 1 site about circuits and races, built as a learning project to practise responsive layout and plain JavaScript.

ACHIEVEMENTS

Winner, hackathon at the pre-conference workshop of ICDMAI 2025 (Team Bombe). 9th International Conference on Data Management, Analytics and Innovation, Kolkata, 21 December 2024.

SKILLS

Languages	JavaScript, TypeScript, HTML5, CSS3
Front end	React, Next.js, Tailwind CSS, Bootstrap, Framer Motion, responsive design
Back end and data	Node.js, Express.js, MongoDB, PostgreSQL, Prisma, Redis (BullMQ), REST APIs, JWT authentication
Tools	Git, GitHub, Vercel, Heroku, Postman, npm
Design	Typography, layout, UI/UX fundamentals

LANGUAGES

English, Bengali and Hindi (all fluent)
